Information

The following databases can be integrated into your website including adaptation to your personal style

Projects and Case Studies

- **Aim:** Centrally compiled information about projects and case studies dealing with coastal management (summary, web page, documents, contacts, sponsors ...)
- **Purpose:** Get access to project results, search for valuable contacts, exchange experiences, identify needs for future projects
- **Special feature:** Information can be regionally filtered
- **Content:** More than 300 projects and case studies

Meetings and Conferences

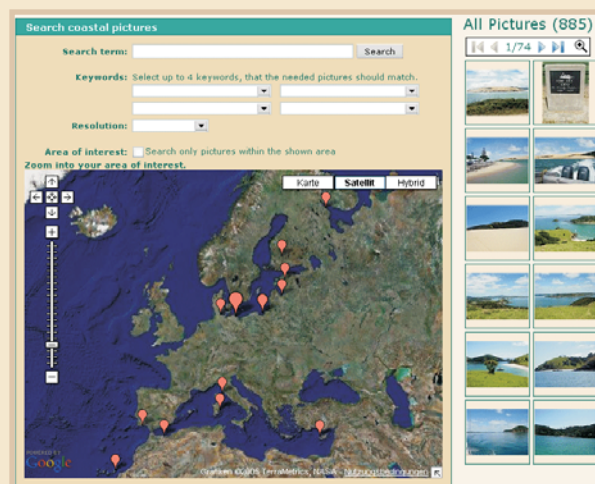

- **Aim:** To inform about all national and international coastal related conferences and workshops
- **Purpose:** Find events relevant to your work; search for previous conferences and workshops, e.g. for later contacts
- **Special feature:** Export function e. g. for use in newsletters
- **Content:** More than 60 upcoming conferences worldwide

Training and Education

- **Aim:** Information about mostly European higher education offers dealing with coastal and marine topics for students and young scientists
- **Purpose:** Find information about coastal- and environmental education
- **Special feature:** Export function e. g. for use in newsletters

Coastal Pictures

- **Aim:** Compile coastal photographs of landscape, uses, problems and activities in coastal regions
- **Purpose:** Download free coastal photographs to trim your website, lighten up your lecture or illustrate your poster; provide pictures from your own area to the community
- **Special feature:** Pictures are geo-referenced and can be located using a Google Maps application
- **Content:** More than 800 pictures

Documents

- **Aim:** Compile coastal related documents to ensure a permanent and user-friendly availability
- **Purpose:** Find papers, reports, documents, strategies, directives, brochures etc. which are of importance for coastal (and marine) practice, read abstracts and download free documents

- **Special feature:** Comprehensive search function including full-text search, filter function for easy integration of personal publication list
- **Content:** About 600 documents

Networking

EUCC Coastal Databases

These online databases provide **regional and international information related to management of and science about the coast for anybody, anytime and anywhere**. The databases inform experts in administration, research, economy and from NGOs as well as students about conferences, projects, documents and educational events and offer coastal pictures.

BECOME PARTNER and benefit from the Coastal Databases:

- **Make your** web presence more **attractive** and **up-to-date** (latest conferences and workshops).
- **Get full control** over the **databases content** as shown within your website by using an easy selection mechanism to provide **targeted information** (regionally, thematically).
- **Benefit** from **once-only information input** into a centralised information storage.
- **Reach the broadest audience possible** by distributing your information automatically through other user portals.
- **Benefit from up-to-date information** provided automatically by partners' inputs.
- **Save money for production and maintenance** of your databases.
- **Decide which databases** you want to present to your users.
- **Integrate** the database into your website, alternatively present feeds; EUCC-Germany fits the database layout to your website **for free** for organisations, for projects as part of the dissemination task.
- **Benefit** from the **multilingual** databases.
